Portfolio

About me

I am a keen learner, passion for discovering optimal solutions to complex problems. I enjoy with collaborative environments, working alongside skilled colleagues to address new challenges. Over the next 2-3 years, my objective is to rapidly advance my data analysis expertise to a senior level.

Professional Experience

Data Analyst Intern, (FM Style)

Da Nang, VN 10/2021 - 05/2022

- Automated the import and integration of multi-source data from shipping partners for the Accounting Department; automated the statistics of sales commission data for the Accounting Department with respect to the sales departments.
- Developed a sales data visualization system (dashboard) with integrated access control for different departments.

Analytics Engineer Fresher, (The SHEA)

Da Nang, VN 06/2022 - 06/2023

- Automated the collection, statistics, visualization, and analysis of competitor product data from e-commerce platforms, websites, and social media.
- Automated the integration of marketing data (Facebook Ads) and sales data (with Sapo) to comprehensively analyze and evaluate the effectiveness of marketing activities and sales consultations.
- Contributed to the development of the company's flexible timekeeping feature using QR codes.

Analytics Engineer Junior, (The SHEA)

Da Nang, VN 07/2023 - now

- Automated the collection and visualization of fashion industry data, ensuring smooth system operation and troubleshooting when necessary.
- Built an automated system for collecting, statistics, visualizing, and analyzing real estate data.
- Contributed to developing a real estate search and advisory system with AI Chatbot.

Education

BSc Data Science and Business Analytics Da Nang University of Economics Da Nang, VN 10/2020 - 06/2024

Graduation Project: 9.2/10

Skills

- Programming:** Python, SQL **Frameworks:** Django, Flask, Rasa **Data Visualization:** Tableau, Matplotlib, Seaborn
- Other Technical Skills:** Natural Language Processing (NLP), Web Scraping (Selenium, BeautifulSoup), Linux

Languages

- English:** Communication skills, Reading skills. TOEIC (505) | 2023

Projects

Real Estate Consultation and Chatbot Integration Application (RealBuddy)

- Automated data collection from real estate websites.
- Data storage and presentation using Django framework.
- User-friendly interface and recommendation system for enhanced user experience.
- Built-in chatbot powered by Rasa for real estate consultation.

This project demonstrates my proficiency in data automation, web development with Django, user interface design, and integrating AI technologies for enhanced user interaction.

Classification of Vietnamese newspaper

In this mini-project, I utilized skills ranging from data collection to data organization and data extraction to train a model using a neuron network with Sequential architecture. The output of the model is to predict labels for articles based on their titles and content
